The Student Interview Workshop, co-sponsored by the California Section, the Santa Clara Valley Section and the NorCal Section of AIChE, again conducted highly successful workshops in northern California. This is the 15th year that we have conducted this workshop. The workshop consists of a short presentation on how to prepare for an interview and a demonstration mock interview for the students. Then we break into small groups of students and two coaches, and each student is interviewed and critiqued. The importance and opportunities offered by professional societies such as ACS and AIChE is also covered.

This year we conducted the program at University of California at Berkeley. About 30 students showed up for 4 hours of coaching, interview preparation and resume reviews.
